

Investment Strategy

Vicksburg Trading Fund actively trades high grade municipal bonds in both the primary and secondary market. The fund utilizes leverage and hedging strategies to mitigate interest rate risk. In addition to trading block size amounts, the fund also employs a systematic electronic trading strategy that leverages its proprietary algorithmic models to bid and re-offer odd-lot municipal bonds. Customized electronic connectivity vehicles help facilitate the large volume of trading with the fund’s counterparties.

Worst Month	-17.78	-3.84
Best Quarter	30.88	7.89
Worst Quarter	-14.22	-6.23

Returns:

Returns reflect the performance of the Vicksburg Municipal Trading Fund LP (the "Master Fund") for the period indicated, net of all fees and expenses incurred at the Master Fund level, including the management fee (annual rate of 2%, paid monthly in advance) and performance allocation (30% above a highwater mark). Unless otherwise expressly noted, the returns are un-audited, estimated, and subject to change. For the period January 1, 2017 to December 31, 2023, the monthly returns come from Clearwater Analytics, the Master Fund's portfolio accounting system. During this period, the General Partner paid all fund-related professional expenses (e.g. legal, administration expenses, etc.). Commencing in January 2024, SGGG Fund Services has prepared the net asset values for the Master Fund, and the Master Fund has been responsible for the payment of professional expenses. Elliott Davis LLC has audited the financials for the period January 2021 to December 2023. Investor returns reflected on your investor statement may vary from the Master Fund's returns based on, among other factors, any fees and/or expenses associated with your investment including a loss carryforward, or in the case of the Offshore Feeder, certain additional expenses (e.g., audit and administration).
